1. GENERAL PROVISIONS

APT Mold objects to any different or additional terms or conditions contained in any request for quotation, purchase order or other document of the BUYER, and no such different or additional terms shall be effective or binding upon APT Mold unless agreed to in writing and signed by an officer of APT Mold. If the BUYER issues a purchase order or other writing addressing the subject matter of this transaction, that writing shall be for the BUYER's internal purposes only and the terms and conditions contained therein shall have no force or effect.

2. QUOTATIONS and PRICES

2.1 All quotations are based on current rates for labor, materials and overheads and with the understanding that the goods will be exported out of China. Quotations shall be valid for 30 days from the date upon which they were given, after which period they are subject to confirmation.

2.2 A quote is provided based on the 3D CAD model and detailed 2D drawings. Budgetary quotes may be generated based on dimensional prints, pictures, photos, 3D models or other parts representations, but quote will not be binding until final review of 3D CAD model. Any change to the 3D CAD model will require an updated quote. APT Mold reserves the right to inform BUYER of lead time changes at placement of order. Quoted lead times reflect rapid tooling completion and T1 sample dates. Molding would require additional lead time. Lead time starts from Design for Manufacturing (DFM) confirmation.

2.3 Quotations are based on the 3D CAD model and material specification provided or approved by the BUYER, including tooling and molding quotation. BUYER is responsible for ensuring that properties and performance of the resin selected meet the requirements of their application. Since dimensional tolerances are highly dependent on the material selected and on the part design, APT Mold will not guarantee that a specific tolerance will be met. Tool life is highly dependent on part design and material selection and any tool life estimations provided, either written or oral, are estimations only and may or may not be accurate. Unless negotiated otherwise, tooling life will not be guaranteed.

2.4 All quotations are based on our general tolerances unless drawings with tolerances are supplied. Our general tolerances are in line with industry standards. We use ISO DIN 2768 (f) for precision machined, metal parts, and ISO DIN 2768 (m) for machined plastic parts. We use DIN 16901 tolerance for plastic injection molding parts.

2.5 The BUYER must issue a hard or soft copy purchase order to APT Mold prior to project kick-off. Project start will begin on the receipt of final part data file. Revised part data received after project kick-off may affect pricing and lead time. In the event of design changes after receipt of a purchase order, the BUYER agrees to pay any additional cost that APT Mold may incur. For example if we start or even complete a job, and must re-start due to design changes, the BUYER agrees to pay for the costs incurred.

2.6 Miscellaneous expenses (such as courier, shipping & handling, special packaging, etc.) are not included in quoted price and might be charged for additionally. The BUYER shall pay all duties and sales, excise, use or other taxes arising in connection with this transaction (other than taxes based solely on APT Mold's taxable income). Extra meetings, travel, time spent in travel and vendor liaison other than described in this quotation are at extra cost and will be billed to the BUYER at standard hourly rate.
